

碳中和与绿色金融理学硕士项目

MSC IN CARBON NEUTRALITY
AND GREEN FINANCE

Carbon Neutrality and Climate Change Thrust (CNCC) addresses key national priorities, trains next generation of leaders who face global challenges of climate change, seize opportunities of the new industrial revolution, and develop technical, institutional and policy solutions for a shared sustainable future.

MASTER OF SCIENCE IN CARBON NEUTRALITY AND GREEN FINANCE

Leveraging the Greater Bay Area's strengths in green finance innovation, the program brings together expertise from environmental science, energy engineering, finance, and public policy to create a comprehensive educational framework. This framework includes theoretical knowledge, practical training, and industry experience. Through a fully English-taught curriculum and a collaborative approach that bridges academia and industry, along with the "Unified HKUST, Complementary Campuses" framework, students will acquire advanced knowledge and skills in carbon neutrality and green finance, as well as insights into domestic and international carbon market policies.

A key highlight of this program is its cross-disciplinary curriculum, which integrates "Carbon Neutrality + Finance". The courses encompass critical areas including energy transition, industrial transformation, green finance, green technology and innovation, carbon accounting and management, carbon trading, and ESG investment strategies. This approach ensures that students develop a well-rounded skill set. Graduates will be well-prepared for roles in government and industry focused on carbon neutrality strategy, project development, trading, and investment, or for engaging in research and policy-making in the realms of carbon neutrality and green finance.

| | Master of Science in Carbon Neutrality and Green Finance | |
|---|--|--|
| Degree Granted by | The Hong Kong University of Science and Technology | |
| Mode of Study | Full-time (2 Years) | |
| Min. Credit Requirement | 34 Credits | |
